## **VTM Series Electric Actuator** (Failsafe Battery Backup Version)

- Part-Turn Electric Actuator
- Failsafe Battery Backup
- Wide Range Of Torque Outputs (310 to 20,355 in-lb)
- Configurable On-Off or Modulating Control
- Explosion-Proof Enclosure

## VTM Series Electric Actuator (Failsafe Battery Backup Version)

### Introduction

The V-Tork VTM is a rugged, compact, failsafe battery backup part-turn electric actuator for on-off and modulating control of valves and dampers. The VTM electric actuator offers a high quality, reliable, solution for valve automation that is also cost-effective. Key functional parameters are easily configured via the onboard digital control board.

1. VTM series electric actuators offer a compact high-strength construction that is also lightweight.

2. Wide range of output torques for versatility in sizing. (310 to 20,355 in-lbs.)

3. Battery Backup with Lithium-Ion battery pack provides failsafe functionality driving actuator to preset fail position on loss of power.

4. Precision-machined worm gear ensures self-locking functionality and anti-reverse rotation.

5. Optional low temperature heater expands temperature rating to -40°F to +158°F.

6. Hard anodized aluminum alloy housing with polyester powder coating to achieve superior anti-corrosion characteristics.

9. Mounting base conforms to ISO5211 standard for ease of mounting to valves.

10. Multiple sizes of drive bushings and insert for ease of mounting to most valves.

11. Clutchless manual override for ease of manual operation

12. Compact electric motor with high starting torque and high efficiency with integral thermal protection to prevent motor overheating.

13. Mechanical position indicator with easy to read dial.

7. Explosion-Proof Enclosure (ATEX Ex db IIC T6 Gb and Ex tb IIIC T80°C Db Certification)

8. Electronic torque protection which monitors motor current provides overload protection.

14. Digital Control Board for configuring key parameters such as open and close positions, fail position, selection of on-off or modulating control method.

## VTM Series Electric Actuator (Failsafe Battery Backup Version)

### VTM Modulating Version

VTM Modulating electric actuators integrate a multi-functional servo amplifier and a position signal transmitter into the standard actuator to provide modulating control. All operations such as calibration, sensitivity setting, and automatic/manual switching are controlled by four buttons on the Control Card making it quick and easy to install and set up.

The Control Card is installed in the actuator enclosure and accepts the 4-20mA control signal from the control system or other control device. An integral potentiometer acts as the electronic valve positioner input to the Control Card.

### Specifications

- Input Signal: 4-20mA DC, 0-5VDC, 0-10VDC
- Input Impedance: 250Ω (4-20mA) or 500Ω (0-10mA)
- Valve Position Sensor: Single-turn absolute value encoder.
- Valve Position Output Signal: 4-20mA DC
- Duty Cycle: 24VDC Motor - 100% (for all Battery Backup versions)
- Motor Blocking Protection Time: 1-25 S (default 6.4S)
- Power Consumption : ≤3VA
- Actuator Operating Sensitivity: 0.1%-12.5%
- Insulation Strength: power frequency 1500V,1min
- Insulation Resistance: above 50MΩ
- Temperature rating: -4°F to 158°F (-40°F to 158°F with optional low temperature heater)
- Maximum Humidity: 90%
- Power Voltage: 120VAC or 220VAC, 60Hz±10%; or 24VDC±10%;
- Signal loss, feedback loss, motor stalling failure protection function.
- Failure code warning function

**Example:** VTM3-300-MO-F-BB-XP would represent a VTM with 300 NM (2655 in-lb) torque output, with 24 volt dc power supply, and battery backup and ATEX explosion-proof enclosure.

**Notice**

Pressure-temperature ratings and other performance data published in this catalog have been developed from our design calculations, in-house testing, field reports provided by our customers and/or published official standards or specifications. They are good only to cover typical applications as a general guideline to users of VTORK products introduced in this catalog. For any specific application, users are kindly requested to contact VTORK for technical advice, or to carry out their own study and evaluation for proving suitability of these products to such an application. Failure to follow this request could result in property damage and/or personal injury, for which we shall not be liable. While this catalog has been compiled with the utmost care, we assume no responsibility for errors, impropriety or inadequacy. Any information provided in this catalog is subject to change without notice for error rectification, product discontinuation, design modification, new product introduction or any other cause that VTORK considers necessary. This edition cancels all previous issues. The final interpretation right of this sample belongs to VTORK
